

**Is your
packaging
spend too
high?**

■ RIGHT SIZE

Tired of using oversized packaging on your items?

At Ribble we strive to make oversized packaging a thing of the past. Using state-of-the-art customised packaging technology you can streamline your packaging process and reduce your overall costs.

With over 75 years of packaging expertise, Ribble has a long history of pushing the boundaries of the packaging industry and demanding a higher standard for our customers. We are the leading manufacturer of Fanfold continuous corrugated board, a versatile, flexible, cost-effective alternative to conventionally produced boxes.

Ribble Packaging is the sole UK agent for Panotec and their industry leading box making solutions. Panotec's revolutionary machinery coupled with Ribble's market leading Fanfold material, produce the highest standard of packaging efficiently, accurately and cost effectively.

Our customers have seen huge benefits including:

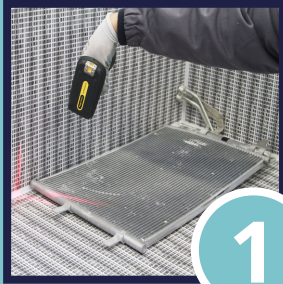

- | | |
|---|-------------------------------------|
| Reduction in transport costs | Improved carbon footprint |
| Reduction in void fill | Improved product protection |
| Reduction in packaging inventory | Improved customer experience |
| Reduction in corrugated costs | Increased flexibility |

We are proud to work with many industry leaders in a wide variety of business sectors who have seen the benefits of a Right Size solution:

- | | |
|----------------------|----------------------|
| Retail | Kitchens & Bathrooms |
| Furniture | Lighting |
| POS/POD/POP | Radiators |
| Digital Web to Print | Gym Equipment |

The Process

1

2

3

4

5

Box design and production using a Panotec system is user friendly and designed to be hassle free from start to finish.

1

Scan the product to gain the dimensions of the size of box required for a perfect fit. Alternatively, select a reference from the library to complete steps 2, 3 and 4 instantly.

2

Select the style of box you would like to create via the integrated touch screen technology.

3

Once the setup is complete our Fanfold enters the machine and the box is cut and creased to your specifications.

4

When the machine has finished creating your box you can take it away ready for the next box to be produced.

5

The box can then be assembled and is ready to package your product in a perfect fit box.

Panotec Solutions

Panotec offer a range of tailored solutions to suit your business needs. each solution is designed to take up a minimal amount of space while maintaining a high performance specification and long lasting reliability. Panotec offers some of the most up to date machinery on the market including:
